Ancra International Announces New Canadian Facility

Ancra International is pleased to announce the opening of its Canadian facility in Mississauga, Ontario. As of April 30th, 2007 this new facility will service all of Ancra's Canadian customers, as well as provide a strong base for Ancra's continued growth in the Canadian Market.

Ancra International is a recognized leader and worldwide designer, manufacturer and distributor of cargo restraint and material handling systems utilized in the transportation industry.

The new facility is located just North of HWY 401 in the Hurontario and Courtney Park West area or Mississauga at:

6710 Maritiz Dr., Unit # 2,
Mississauga, Ontario. L5W 0A1.

Ralph Abato, Director of Sales and Marketing said, "Ancra International is proud to be back in Canada with our own facility to support our loyal customers and the continued explosive growth we are experiencing. It has been our aim to better support the goals and achievements in Canada with a facility that can continue to meet the needs of the customer base here. We appreciate the loyalty of those customers that have partnered with us and see this as a next logical step in supporting them."

The facility is located in a new and growing industrial park, just minutes away from Hwy 407, 410 and 401, as such it provides quick and easy access to all of our customers wanting to pick up their orders quickly and avoid unnecessary traffic congestion.

.....

While the facility will initially operate as a warehouse and distribution centre, there are already plans being made to expand into custom sewing, stenciling and assembly. Ancra's investment in this new facility provides them with capacity to carry four times the inventory previously carried in Canada. A state of the art bar coding system is also being installed in the operation in early May and this will be followed closely by full EDI capability.

"We are looking forward to servicing the trucking industry in Canada with a high quality engineered product when all our valued customers need it," says Tom Leone, Vice President of Operations.

"The new facility will provide the Canadian market quick response with custom cargo restraint products in addition to the world class offerings from Ancra's standard catalog of products," adds Steve Frediani, President of Ancra International.

Ancra International would like to thank all our customers both old and new who have made this investment in Canada possible. We look forward to providing you with exceptional customer service from our new facility.

Sincerely,

Brian Larocque
Canadian Sales Manager
